TPM BIOTECH SDN BHD

A wholly owned subsidiary of TPM Corporation

TPM Biotech empowers biopreneurs to penetrate the domestic and global markets by providing a wide range of internationally benchmarked facilities and services. Working closely with customers, they develop strategies to maximise their clients' return on investments.

CORE BUSINESS

TPM ENGINEERING SDN BHD

A wholly owned subsidiary of TPM Corporation

TPM Engineering is equipped with advanced engineering facilities in areas of CNC machining, sheet-metal fabrication, rapid prototyping and product design. They also offer high quality manufacturing service for customised products in low to medium value.

CORE BUSINESS

CNC Machine Tools	Design and Product Development	Digitisation & Reengineering	Rapid Prototyping	Mould and Die
Jigs and Fixtures	CNC Precision Machining	Plastic Injection Moulding	Integrated Metal Fabrication	Metrological Services

TPM IT SDN BHD

A wholly owned subsidiary of TPM Corporation

TPMNet is sub division in TPM IT Sdn Bhd. It became the service arm of IT network and infrastructure at TPM which manages all internet related services, Local Area Networks (LAN), Internet access, fiber connectivity, web hosting and server co-location, together with PC support maintenance and Helpdesk coordination. This unit manages the complex networking installed based, multi-faceted infrastructure, design, process and services.

CORE BUSINESS

It evaluates and reviews the infrastructure topology, apart from developing, and renewing the network contingency plan, security processes when required. The network engineers support the network advocacy group, maintain the log of network activities and ensure that the proper network redundancy is in place and in effect at all times.
